Dear Hiring Manager,

I am writing to express my interest in a Software Developer or Backend Developer role at your organization. With over 6 years of experience in full-cycle software development and strong expertise in **Node.js**, **NestJS**, **TypeScript**, and **AWS cloud services**, I am confident in my ability to make a valuable contribution to your team.

In my current role as a Senior Backend Developer at Oyelab Technology, I have led the development of scalable backend solutions for clients across Germany and the USA, including e-commerce, home services, and logistics platforms. I have consistently delivered high-performance APIs, integrated secure payment gateways, implemented CI/CD pipelines, and optimized microservices architecture for performance and scalability.

My proficiency in both **relational (PostgreSQL, MySQL)** and **NoSQL (MongoDB, Redis)** databases, along with practical experience in **cloud infrastructure (AWS)** and **DevOps tools (Docker, Git, Nginx)**, makes me well-suited for modern backend development. I also have hands-on experience with frontend technologies like Angular, allowing for smooth collaboration across full-stack teams.
Beyond technical capabilities, I bring strong communication skills, a problem-solving mindset, and a passion for continuous learning. I am eager to bring these strengths to a dynamic team where I can grow and contribute meaningfully to impactful products.

Thank you for considering my application. I welcome the opportunity to further discuss how my background aligns with your company's needs.

Sincerely,
Kumar Chandan
